

“ 10/10

A Professional, well-versed team with excellent skill sets and commendable work and business ethics.”

Mick Sheehan,  
Director of IT  
Avery Healthcare Group

 **datastore365**  
the cloud specialists

**Avery Healthcare operate private residential, dementia and nursing homes throughout the UK, with a focus on the highest possible care standards. We embrace the right technology at the right time to ensure that we continue to be one of the top operators in the UK.**

Initially our relationship with Datastore 365 began when our local onsite backup system began experiencing issues that were no longer going to be sustainable. As the business was at this time also expanding we needed to transition from local onsite backups to a more robust cloud DR solution. This was provided by Datastore 365 using their Asigra Cloud Backup Platform. Since then the business has decided to adopt a cloud first strategy and as a result of this, as our onsite servers have been coming to the end of their life, we have been transitioning services to the cloud. We have migrated our business-critical care management platform to the Datastore 365 private cloud with real-time replication to a secondary datacentre. More recently we have undertaken a hybrid office 365 migration and have started to embrace Microsoft Teams, OneDrive, SharePoint and Exchange Online throughout the business. Datastore 365 have assisted us throughout this process. As a result, we now have significant amounts of data stored within the Microsoft Cloud and we have peace of mind knowing that this is protected using the datastore 365 hosted Veeam Backup for Office 365 platform to give us a secondary copy of that data stored securely and separately away from the Microsoft cloud.

## case study

Professional Services  
Consultancy

It was important to us to find a professional, local company that could support our needs as a growing business, but also one that specialises in cloud technologies. Their cloud agnostic approach means that not only do they offer their own cloud services but they are also experts in the Microsoft public cloud. This blend of private and public cloud ticked all the boxes for us. In addition to this the care sector has significant regulation and compliance requirements and for us the fact that datastore 365 are an ISO:27001 certified company means we can be assured that our data is in safe hands. In addition to this it helps us remain compliant with our own internal auditing process (Sarbanes Oxley)

Their wealth of experience in all things cloud has been essential in helping us as a company to embrace the cloud and all the benefits that brings. The Datastore 365 support team are helpful, proactive and quick to respond to any issues or queries. We now spend less time managing onsite server infrastructure and as a result of this, our uptime and availability of critical systems has improved. It also means that we have been able to reduce our end of life 60+ Server estate running MS Server 2008R via remote connectivity into the cloud.
